This spreadsheet has been compiled by Pete Zemroch																			
and is based on the extensive researches of football																			
historians such as Dave Twydell, Paul & Shirley Smith, Douglas Rose and Simon Inglis.																			
The number in each cell indicates the number of home league games that a club played at a																			-
particular ground in a particular season.																			
S indicates the entire season, N indicates that the exact																			
number of matches is unknown and further																			
information would be appreciated.																			
League games only are included, not cup ties or friendlies																			
The preference is to use non commercial names for														\vdash					\vdash
stadia wherever possible.																			
Please acknowledge the source of this spreadsheet if																			
you wish to use the information elsewhere.																			
I would also appreciate it if you could make a token contribution to my pet cause which is

This spreadsheet has been compiled by Pete Zemroch									
and is based on the extensive researches of football historians such as Dave Twydell, Paul & Shirley Smith,									
Douglas Rose and Simon Inglis.									
The number in each cell indicates the number of home									
league games that a club played at a									
particular ground in a particular season.									
S indicates the entire season, N indicates that the exact									
number of matches is unknown and further									
information would be appreciated.									
League games only are included, not cup ties or friendlies									
The preference is to use non commercial names for stadia wherever possible.
